A. Posterior Effects Under Scaling A (+10 pp Ratio) vs Scaling B (+25% Relative Log)

Funding Scaling: Scaling A: +10 pp of GDP/person Ratio Scaling B: +25% Relative Log Increase

B. Standardised Posterior Residuals Across University Funding Z: Scaling A vs Scaling B (+10−Year Horizon, N = 283)

Funding Scaling: Scaling A (+10 pp Ratio) Scaling B (+25% Relative Log)

C. Unseen Holdout Countries (Fold 5): Scaling A vs Scaling B Out−of−Sample Predictions (+10−Year Income Tax Share)
